

In Science, we have been investigating solutes, solutions and solvents. During this lesson we investigated and demonstrated water vapour 'dissolving' into the air around it. Really, it was just fun to use the airzooka!

During PE lessons we have started to use the 'RealGYM' dice. They are really fun to use and they help us to employ different balances. These look tricky!

Our Topic during term 3 was 'Iceberg!' Can you guess what historical event we studied? In this picture, you can see two children researching the famous cruise ship!

As part of our 'Iceberg!' Topic, 3H painted a huge picture of the Titanic! They used pointillism. That's right, the entire ship is made up of tiny dots of paint!
